PAR 46

HEADLIGHT REPLACEMENT

The innovative LED SMART PAR 46 solid-state L.E.D headlight is manufactured with a single piece aluminum heat sink body and designed to operate in the harshest environments.

The high-impact tempered glass lens allows an even transfer of heat for ice and snowmelt during sub-zero temperatures. This ensures a crisp, clear, glare-free lens performance and illumination.

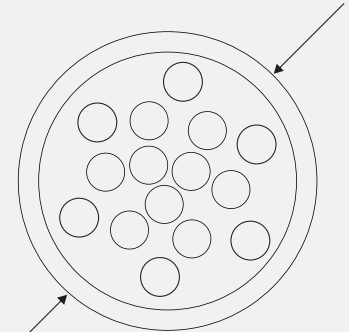

The LED SMART PAR 46 operates at 20 watts with a promised life of 50,000 hours, compared to traditional PAR 46 tungsten halogen incandescent headlamps that operates at 60 watts with a promised life of 800 hours. The LED SMART headlight delivers an 85% longer life!

Our premium PAR 46 headlight bulb is energy efficient, lead-free, eco-friendly, and guaranteed with a 5-year warranty.
